

# SAE100R14C **ACCESSORY HOSE**

## PTFE CONVOLUTED

This braided hydraulic hose is designed for applications where excellent chemical resistance, low coefficient friction, and non-contamination properties are required.

## TECHNICAL DETAILS

### CONSTRUCTION

**Inner Tube:** Helically-convoluted sintered polytetrafluoroethylene (PTFE)  
**Reinforcement:** One braid of 304-grade stainless steel wire

### APPLICATION

Generally used in automotive, chemical, pharmaceutical, food processing, plastic and rubber moulding machines. For some applications, the tube can be made conductive to dissipate electrostatic charges.

### SPECIFICATIONS

**Temperature Range:** -54°C - 260°C  
**Hose Tails:** C series
